I.   Amendments to the Claims

This listing of claims shall replace all prior versions, and listings, of the claims in the application.

Listing of Claims

1. (Currently Amended) A computer implemented method for pricing a trade comprising:

~~providing a user input capable of entry of trade data;~~

~~providing a structure capable of~~ receiving ~~said~~ trade data entered into a programmable computer by a user~~;, wherein said structure is capable of~~

transmitting said trade data to a pricing system via email or an email attachment;

storing said trade data in a database of said pricing system and comparing said trade data against said database to prevent duplicate trade data entries;

receiving ~~providing a user input capable of manual entry of~~ pricing data corresponding to said trade data, wherein pricing data is manually entered by the user via the programmable computer ~~is added to said structure and pricing data not manually entered by the user is~~ or transmitted ~~received by said structure~~ from [[a]] said pricing system; and

displaying ~~said structure with~~ said trade data and corresponding ~~including~~ pricing data ~~information~~ on a computer screen.

2. (Currently Amended) A method in accordance with claim 1 further comprising:

encrypting said email or email attachment ~~structure~~ before transmitting said email or email attachment ~~structure~~ to a pricing system.

3. (Currently Amended) A method in accordance with claim 1 further comprising:

decrypting said email or email attachment ~~structure~~ after receiving said email or email attachment ~~structure~~ from said pricing system.

4. (Currently Amended) A method in accordance with claim 1 wherein ~~providing a user input for~~ ~~entering one or more trades comprises~~ said trade data is entered from the user's treasury system and wherein said method further comprises translating said trade data ~~representing one or more~~ ~~trades from a user treasury system~~ into a form suitable for use in said programmable computer ~~structure~~.

5. (Currently Amended) A method in accordance with claim [[1]] 4 wherein displaying said ~~structure~~ trade data and corresponding pricing data comprises displaying said translated ~~translating~~ trade data ~~from said structure into data representing one or more trades in a user~~ ~~treasury system~~.

6. (Cancelled)

7. (Currently Amended) A computer implemented method for pricing a trade comprising:

receiving trade data entered into a programmable computer by a user; ~~providing a user~~ ~~input capable of entry of trade data into a structure at a user system, wherein said structure is~~ ~~capable of~~

transmitting said trade data to a pricing system via email or an email attachment;

storing said trade data in a database of said pricing system and comparing said trade data against said database to prevent duplicate trade data entries;

receiving ~~providing a user input capable of manual entry of~~ pricing data corresponding to said trade data, wherein said pricing data is manually entered into the ~~structure at the user system~~ programmable computer by the user, ~~wherein pricing data not manually entered at the user~~ system is or received ~~by said structure~~ from said pricing system ~~and transmitted to said user~~ ~~system; and pricing data manually entered at the user system is added to said structure at said~~ ~~pricing system, and transmitted to said user system~~; and

displaying said trade data and corresponding ~~said~~ pricing data on a computer screen at said user's programmable computer ~~system~~.

8. (Currently Amended) A method in accordance with claim 7 further comprising:

encrypting said ~~structure~~ email or email attachment at said user's programmable computer ~~system~~ before transmitting said trade data ~~structure~~ to said pricing system.

9. (Currently Amended) A method in accordance with claim 8 further comprising:

decrypting said ~~structure~~ email or email attachment at said pricing system after receiving said ~~structure~~ email or email attachment from said user's programmable computer ~~system~~.

10. (Currently Amended) A method in accordance with claim 7 further comprising:

encrypting said ~~structure~~ email or email attachment at said pricing system before transmitting said ~~structure~~ email or email attachment to said user's programmable computer ~~system~~.

11. (Currently Amended) A method in accordance with claim 10 further comprising:

decrypting said ~~structure~~ email or email attachment at said user's programmable computer ~~system~~ after receiving said ~~structure~~ email or email attachment from said pricing system.

12. (Currently Amended) A method in accordance with claim 7 wherein ~~providing a user input for entering~~ said trade data is entered from a user's treasury system and wherein said method further comprises translating trade data ~~representing one or more trades from a user treasury system~~ into a form suitable for use in said ~~structure~~ email or email attachment.

13. (Currently Amended) A method in accordance with claim 12 [[7]] wherein displaying said structure ~~structure~~ trade data and corresponding pricing data comprises displaying said translated ~~translating~~ trade data ~~from said structure into data representing one or more trades in a user treasury system~~.

14. (Cancelled)

15. (Currently Amended) A method in accordance with claim ~~14~~ 7 further comprising:

executing one or more trades using said trade data stored at said pricing system.

16. (Currently Amended) A computer implemented method for pricing a trade comprising:

~~providing a user input capable of entry of trade data;~~

~~providing a structure capable of~~ receiving ~~said~~ trade data entered into a programmable computer by a user~~, wherein said structure is capable of~~

transmitting said trade data to a pricing system via email or an email attachment;

storing said trade data in a database of said pricing system and comparing said trade data against said database to prevent duplicate trade data entries;

receiving ~~providing a user input capable of manual entry of~~ pricing data corresponding to said trade data, wherein pricing data is manually entered by ~~the~~ said user ~~is added to the structure~~ and displayed with said trade data and corresponding ~~including~~ pricing information devoid of encrypting and decrypting ~~of said structure~~ on a computer screen~~; and~~ or wherein pricing data ~~not manually entered~~ is received ~~by said structure~~ from a pricing system[[;]] and displayed ~~displaying said structure~~ with said trade data and corresponding ~~including~~ pricing information on a computer screen.
